Subject: DNREC Approval of Effluent Pipeline - Supplemental Remedial Investigation

Dear Mr. Johnston:

DNREC has reviewed and approved Standard Chlorine's workplan for Supplemental Remedial Investigation - Effluent Pipeline dated October 15, 1991. Standard Chlorine should proceed immediately with implementation of this investigation.

Standard Chlorine has requested relief in performing chemical analysis of Aroclor compounds in groundwater samples based upon your letter of October 31, 1991 to Kalbacher. DNREC agrees that PCB contaminants are not likely to be present in the groundwater at these sampling locations. Therefore Standard Chlorine is not required to analyze for these constituents in groundwater samples. Standard Chlorine is required to sample for aroclor constituents in soil samples taken from the effluent investigation.

DNREC and EPA appreciate the cooperative effort Standard Chlorine has made towards successfully and efficiently negotiating the terms of this investigation. I look forward to reviewing the draft Remedial Investigation report due December 13, 1991.

Sincerely,

Karl Kalbacher
